

World of Cloud Accounting

Cloud accounting with PKF Francis Clark is more than software it's like having a virtual Financial Director. With remote login we will be able to carry out regular checks on your finances, look at the current position with creditors, debtors and banking, basically a health check when needed. We will be able to give you feedback that will help grow your business and spot potential issues early on.

Cloud accounting allows you to manage your bookkeeping on the move; you can raise invoices and expense claims whilst out of the office. You get instant access to accountancy information via desktop, laptop, tablet or mobile.

It is important for businesses to choose a cloud system that suits their needs so at PKF Francis Clark we conducted research into what is available in the market and selecting three quality brands based on their performance including access, ease of use, capability and security.

- Sage One
- QuickBooks
- Xero

What our cloud accounting clients say?

"With the use of cloud accounting I can access our accounts even when I'm away from the office as long as I have a Wi-Fi connection. Another key benefit is that the package I use supports different currencies, this is a major bonus as we operate a Euro bank account and therefore need to be able to record our Euro transactions on a regular basis."

Debbie Buse, Director of Atlantic Translations Ltd

"Cloud accounting is proving more useful the more I use it. Best feature is that it links directly with our bank account, making reconciliation and expenses so much quicker and easier. Would definitely recommend it, especially to smaller organisations that don't have specific finance staff or departments."

Mel Tucker, Director of Iridescent Ideas CIC

We have invested in our staff and now have 23 accredited and trained advisers providing top class client support service across all our offices.
